

Workplace English Course

Boost your Career - and Your Confidence!

Heartland's Workplace English Course is a **daily online workshop** to help you gain practical work language and soft skills.

In this course, we learn English **effortlessly**:
no textbooks, **no** tests, and **no** boring grammar.

Instead, we use a **research-based method of storytelling** to create and share memorable learning experiences that help us to understand language on a deeper level.

Every day we'll meet and create stories together focused on workplace skills like **negotiation**, **problem solving**, and **leadership**. And, we'll support our learning outside of class time with reading material and a community chat room.
